

Sage 100 Version 2016 Integrated Solutions Compatibility Matrix Revised as of August 7, 2017

The Integrated Solutions Compatibility Matrix is intended to cover all information as of August 7, 2017, regarding all Integrated Solutions compatibility with Sage 100 version 2016. Any version not listed should be assumed **incompatible**. If your configuration is not listed, Sage Customer Support cannot provide support for you. All hardware and system requirements must meet or exceed the minimum requirements as indicated in the *Sage 100 Supported Platform Matrix*. Only additional requirements are listed in this matrix.

Note: It is critical that before and during an installation, this document be thoroughly reviewed, along with the *Sage 100 Installation and System Administrator's Guide* and other documents found on the *How to install Sage 100 and locate installation and upgrade information* knowledgebase article. For this Web page log into the Sage Support Web site at: <https://support.na.sage.com/>

Throughout this document, other companies' Web sites are referenced; the content on those sites can change at any time. Sage has no control over, and cannot be responsible for the content of other companies' Web sites.

Note:

- Please check for and apply any available Sage product updates from the Sage Support Web site at: <https://support.na.sage.com/>. For more information, consult your Sage business partner.
- Integrated product version compatibility indicated in this document does not necessarily imply that the integrated product vendor supports noncurrent versions. Refer to the integrated product vendors' Web site for specific information on supported versions.
- Consult the integrated product's website for the most current information regarding that products compatibility with 64 bit versions of Windows.
- For more information on Sage 100 Version support and retirement, see the Supported Versions document located [here](#).
